

Seamless Integrations for Smarter Operations

Expand what your system can do with built-in compatibility across your tech stack.

01 GENERAL LEDGER COMPATIBILITY

Platforms: Sage, Blackbaud, QuickBooks, Infor

Ensure accurate, real-time financial data sync with your GL system. This integration streamlines bookkeeping, improves reporting accuracy, and reduces manual errors, making reconciliation and audit prep faster and more reliable.

02 MILEAGE TRACKING

Platforms: Triplog, Emburse

Eliminate manual mileage logs. These integrations automate trip tracking and reimbursement, while giving you visibility into travel costs and policy compliance.

03 POINT-OF-SALE SYSTEMS

Platforms: Toast, Aloha, TouchBistro

Connect sales to your back office in real time. Import transaction data, centralize reporting, manage inventory more efficiently, and reconcile sales with confidence.

04 LEARNING MANAGEMENT SYSTEMS (LMS)

Platforms: Relias, Schoox, and Litmos

Sync with training platforms to track employee learning, compliance, and certifications. Tie development progress directly to performance goals, all in one system.

05 OPEN API ACCESS

Our open API offers the flexibility to connect with internal tools, automate workflows, and tailor the system to your organization's evolving needs.
